Objective

•Motivated IT professional with a solid foundation in Information Technology, specializing in Java Programming and Front-End Development. Eager to leverage strong analytical skills and a proactive, hard-working approach to solve real-world technical challenges and contribute to innovative software solutions within a fast-paced team environment.

Education

- **Hindusthan Institute of Technology, Coimbatore** 2022-26
 - Bachelor of Technology & Information Technology
 - 7.92 CGPA
- **Government Higher Secondary School** 2020-22
 - HSC
 - 81%
- **Government Higher Secondary school** 2018-20
 - SSLC
 - 76%

Experience

- **Techvolt Software Private Limited** Aug 2023 - Aug 2023
 - Web Development - Front End Development Intern
 - Developed web interfaces using HTML, CSS, and JavaScript to ensure seamless cross-device compatibility while collaborating with design teams to translate wireframes into high-quality code
- **VEI Technologies** July 2024 - July 2024
 - Java Development - Full Stack Development Intern
 - Developed backend applications using Java and Object-Oriented Programming principles to create efficient and scalable software solutions.
- **VEI Technologies** Dec 2024 - Jan 2025
 - Internet of Things Intern
 - Assisted in developing IoT-based systems using sensors and microcontrollers, contributing to data collection and system integration.

Technical Skills

- Programming: Java (Core Java, OOP)
- Web Development: HTML, CSS, JavaScript
- Database: MongoDB
- Tools: Git, GitHub, VS Code

Projects

- **Insomnia Prediction using IoT Integrated Smart Pillow**
Developed an IoT-based smart pillow system using LDR, MEMS, and pressure sensors to detect insomnia patterns, integrating machine learning techniques (PCA, RFE) and storing data in MongoDB.
- **A Decentralized IoT and Machine Learning Framework for Hyperlocal Cloudburst Prediction**
Developed an IoT-based cloudburst prediction system using weather sensors and machine learning to analyze rainfall, temperature, and humidity data, enabling early warning alerts.

- **Online file storage System**

Developed a web-based file management system enabling secure user registration, file uploading, downloading, and deletion. Implemented backend API with Python, utilizing MySQL for metadata storage and secure user authentication. Built an interactive frontend with JavaScript and CSS for seamless file organization.

- **Sudoku Game**

Developed a Sudoku game application using Java and GUI with multiple difficulty levels (easy, medium, hard), featuring hints, themes, and error detection.

Certifications

- **AI DevOps Engineer :**

Completed 480-hour AI DevOps Engineer certification from Skill India.

- **National Conference:**

Presented a technical paper entitled "AI Powered Document Verification System" at the National Conference on Futuristic Trends in Artificial Intelligence and Nano Science for Modern Engineering Applications.

Interests

- Web Development
- Java Development
